

Related Technical Instruction Providers for Apprenticeship

As an Apprenticeship Sponsor, you can partner with any college, university, or technical school that has the capability to provide the relevant technical instruction outlined in your Program Standards. Your program can utilize existing course offerings or components of degree and certificate programs. Many schools, including the Community College of Rhode Island, have experience designing instruction around the needs of apprenticeship programs. Sponsors with in-house training capacity may create and deliver their related technical instruction in-house, as CVS Health does for their Pharmacy Technician apprenticeship.

Examples of Related Instruction Providers:

Biomedical Equipment Technician

- Community College of RI, Engineering & Technology Department; Warwick
