

Prepare for a good-paying career in one of Rhode Island's fastest growing industries with the Community College of Rhode Island's Fast Track to CNC Manufacturing program.

Earn free college credits toward your associate degree in Advanced Manufacturing while you learn the skills employers are looking for right now in this two-phase advanced manufacturing boot camp.

PHASE 1:

Earn 10 college credits in this 10-week program that introduces the fundamentals of manufacturing, safety, precision measurement and blueprint reading. Get job interview training, résumé building and help finding your first position as a CNC operator. **Also earn your OSHA-10 certification.**

PHASE 2:

Earn 6 college credits while learning deeper skills and cutting-edge advanced manufacturing processes to become a CNC machinist.

Those who complete both phases will be only one class away from completing CCRI's certificate in Advanced Manufacturing.

ELIGIBILITY

The program is free to applicants who are 18 years or older, Rhode Island residents and who are U.S. citizens or work authorized.
