Course Outline/Topics to be Covered

The Association of Business Process Management Professionals International (ABPMP) considers Business Process Management (BPM) to be both a management discipline and a set of technologies that support managing by process.

Business process management (BPM) is a disciplined approach to identify, design, execute, document, measure, monitor, and control both automated and non-automated business processes to achieve consistent, targeted results aligned with an organization's strategic goals.

BPM involves the deliberate, collaborative and increasingly technology-aided definition, improvement, innovation, and management of end-to-end business processes that drive business results, create value, and enable an organization to meet its business objectives with more agility. BPM enables an enterprise to align its business processes to its business
