Course Outline/Topics to be Covered

The Clinical Data Management program is designed to provide extensive training in the niche domain of clinical data management. It incorporates basic training on clinical research and end-to-end training on clinical data management processes, documentation and clinical data management systems. The contents of the training program are seamlessly integrated and cover the entire process of clinical data management from Study Setup to Database Lock along with the regulations guiding each process.

KEY TOPICS

- Overview of Clinical Research
- Fundamentals of Clinical Trials
- Clinical Trials Management
- Clinical Data Management Process and Systems
- Learn and understand the clinical data management process, including systems and techniques and documentation
- CDM Documentation Overview
- Hands-on-training with Oracle Clinical *

Upon completion, you will have an understanding of clinical data management processes, techniques, documentation and various clinical data management systems.
