Course Outline/Topics to be Covered

This Clinical Research Associate Certificate program provides training in the core competencies of clinical research including introduction in clinical research and fundamental of clinical trials. The goal of our Clinical Research Associate program is to develop and train professionals to understand and navigate an array of regulations and policies that pertain to conducting, monitoring and managing clinical trials. The program covers various aspects of a clinical trial from site selection, patient recruitment, choice of the investigator, study conduct, protocols, safety documentations, and study close out. In addition, the program is designed to cover international regulations. Our students learn from some of the best faculty in the industry who are certified practitioners with deep experience in clinical trials and monitoring and have a wide knowledge of ICH-GCP, GMP, GLP and HIPAA. KEY TOPICS • Understanding of regulations and guidelines like ICH-GCP, HIPAA • Understanding of regulatory bodies like IRB, FDA • Understanding of the drug discovery and approval process • Basic understanding of the ethical issues in clinical t

Required academic grade levels to enter program

Reading Grade Level College

Math Grade Level College

English Proficiency Fluent

Required to enter training program

Physical Yes No
