Course Outline/Topics to be Covered

Green Supply Chain Management uncovers the implications of today's most pressing environmental issues and demonstrates how green practices can actually save money, increase efficiency and reduce delivery time. You will learn how to leverage eco-friendly practices to reduce costs and comply with environmental legislation. Key Topics:

Essential strategies and foundations. Carbon accounting, sustainability, renewable energy, green house gases (GHG), water and land use. GHG and climate change regulations. Manufacturing, demand, factory, materials and network planning. Supplier management and purchasing essentials. Transportation, warehousing and distribution. Direct store delivery, returns and recycling. Value enhancement strategies. Please refer to our website for more information: <http://edc.bryant.edu>
