Course Outline/Topics to be Covered
 Six Sigma is a quality improvement process, driven and supported by top leaders in today's most successful organizations. This process improvement quality initiative uses a structured quantitative approach for driving improvement in an organization through the use of defined metrics in manufacturing, service, and financial processes within an organization. This focus on product, process, and transaction can be defined and understood at three distinct levels: metric, methodology, and philosophy. This course is designed to provide the training required to certify an individual to Six Sigma Green Belt status. Class can be completed online at any time, and you will have 5 months to complete. Please refer to our website at edc.bryant.edu for more information.
