Course Outline/Topics to be Covered

The Pharmacy Technician program focuses on the subject areas required for success as a Pharmacy Technician. The profession of a Pharmacy Technician is the process of adopting pharmaceutical care as its primary mission. Increased use of the well-trained and appropriately supervised technicians is becoming a key component of the pharmacy strategy to move beyond its traditional functions. The goals of the Pharmacy Technician Program are divided into two areas. The first reflects the major job responsibilities of the pharmacy technician and the second documents knowledge, skill and attitude requirements that underlie the performance of job responsibilities. The major areas of responsibility for the Pharmacy Technician are: collecting, organizing and evaluating information for direct patient care; medication use review; departmental management; and demonstrate ethical conduct in all job related activities. This program has been designed to meet all of these objectives.
