Course Outline/Topics to be Covered

The High Performance degree program offers an additional quarter of study in high performance vehicle modification and testing along with the study in design, theory of operation, and servicing techniques of the many systems and system components of today's automobiles. Training in engine construction and design, engine repair, electricity, electronics, suspension, steering, brakes, transmissions, fuel systems, ignition systems, and emission controls is provided to assure maximum coverage. Advanced training in air conditioning, drive trains, and transaxles is offered as well. A final engine performance class covers computerized engine controls, fuel injection systems, tailpipe emissions diagnosis, and ABS braking systems.
