Course Outline/Topics to be Covered

This program is designed to include all facets of the residential and some facets of the commercial building trade as well as aspects of the cabinetmaking and design trade. The program also focuses on the role of computers in the estimating, design and manufacturing components of the industry. This program has two tracks: Building Construction and Cabinetmaking and Building Construction and Design. Both tracks include the study of computer assisted drafting (CAD), print reading, and estimating. Construction topics include site work and framing procedures.
